

GEOMOBY & HARDHAT PARTNERSHIP SET TO TRANSFORM PRODUCTIVITY AND IMPROVE HEALTH & SAFETY IN SURFACE AND UNDERGROUND OPERATIONS.

The GeoMoby and HardHat partnership is set to disrupt the way mining companies operate in harsh operational environments.

PERTH, WA: GeoMoby, an award-winning solution provider that is shaping the way location intelligence is used, partners with HardHat, an innovative cloud solution provider that enables businesses to run as one on a single platform.

The combination of GeoMoby's patented geolocation technology and HardHat's productivity and real-time reporting platform provides a fully integrated operational solution for surface and underground environments.

The partnership will deliver real-time health & safety compliance, workforce, and asset productivity across business, in any operational environment. Using GeoMoby's geofencing, location tracking and health monitoring technology, access to reliable data from harsh environment has been made possible in a scalable way. Combined with HardHat's productivity and real-time reporting capabilities, all the company's business-critical information can be found in one place, executives and supervisors providing the power to make right operational decisions and improve safety and productivity outcomes.

Management will be able to gain contextual, location-based data for more informed decision making. Supervisors can gain location-based insights on surface and underground operations; giving them real-time visibility to safely support their team in delivering across sites, projects, and operations. Through a secure communications channel, field workers will be able to capture, report and manage any health & safety hazards based on their location, providing supervisors and management with real-time access to critical safety, operational and incident information.

“We are excited to partner with GeoMoby. Their location intelligence technology is industry leading. The HardHat platform’s intuitive user interface combined with GeoMoby’s solution will maximise the value location-based data can bring to a business. With our partnership, people across the organisation can access contextual information from a single platform to help them do their jobs safer, faster, and smarter” said Tim Smith, CEO of HardHat.

“The battle of tomorrow’s business performance will be won using contextual, real-time, location-based data. The partnership with HardHat will strengthen the GeoMoby offering, allowing us to deliver data across the organisation seamlessly” said Chris Baudia, CEO & Founder of GeoMoby.

GeoMoby and HardHat will launch the partnership at Diggers & Dealers in Kalgoorlie on August 2-4. Together with mining innovation leaders, they will be exploring how the combined solution will help answer some of the industry’s challenges in safety, sustainability, and productivity.

ABOUT HARDHAT

HardHat believes the best businesses run as one. We are a technology company that connects your organisation on one platform. Our solution helps build a connected organisation; enabling you to manage information about your people, projects, and operations – all from one place.
